

Senior Project Manager Zürich or Munich

Embotech is an award-winning software scale-up developing cutting edge autonomous driving solutions, with focus on private ground applications such as Automated Vehicle Marshalling (AVM) in passenger car factories and Autonomous Terminal Tractors (ATT) at port terminals and logistic centres. We are delivering safe autonomous transportation by leveraging the real-time optimization technology that we have been developing since 2012.

Our team is comprised of highly skilled employees with a passion for excellence and efficiency. We are looking for highly motivated people to help us solve one of the most complex challenges of tomorrow and take our company to the next level.

You will join the Automated Vehicle Marshalling (AVM) team as Senior Project Manager who can lead and manage multiple complex projects bringing them from conception to successful completion.

Responsibilities:

Project Management & Execution:

- Lead end-to-end project planning, execution, and delivery of pilot and rollout projects for Automated Vehicle Marshalling.
- Coordinate timelines, budget, resource allocation, and stakeholder communication to meet project milestones.
- Together with R&D, prioritise delivery of product features, including safety certification.
- Oversee on-site operations, including system testing, commissioning, rollout, performance validation and risk management.

Customer Engagement:

- Act as the primary point of contact for customers during project phases.
- Build and maintain strong relationships with customer operations teams, ensuring alignment on goals and expectations.

Operational Oversight:

- Collaborate with R&D, engineering, product, and operations teams to ensure system availability and safety.
- Monitor and report on system performance during testing and deployment phases.
- Identify improvement opportunities for operational efficiency and scalability.

Collaboration:

- Support the integration and configuration of autonomous systems to meet customer needs.
- Provide detailed feedback and insights to drive product and feature development.

Qualifications:

- 7+ years of project management or operations experience in automotive logistics, autonomous vehicles, or similar.
- Master's degree in engineering, business, or a related field
- Proven ability to manage complex projects with multiple stakeholders. Project management certification (PMP, CAPM or the likes) preferred
- Experience with agile methodology, experience with JIRA and other project management tools
- Strong analytical skills to support data-driven decisionmaking.
- Exceptional communication (English & German), negotiation and relationship management skills.
- Detail-oriented with the ability to balance deep focus and big-picture thinking.
- Willingness to travel and collaborate with teams across multiple locations.
- Experience with autonomous driving systems
